

Mathematical Analysis — More on Chapters 5 and 6

For Monday, May 17, 2021

Since several people are still having trouble with Chapters 5 and 6, we can't add more material until everyone is solid on those. On the other hand, I don't know what — in terms of things I could say or additional problems I could write up — to do to help make those more solid. So I have just chosen more Spivak problems.

Reading

The reading therefore has nothing additional. For discussion, we'll continue to focus on Chapter 6.

In-Class Problems for Monday

Problems 4, 10, 11, and 12 from Chapter 5. I am hoping these will help cement Chapter 5.

Problem 7 from Chapter 6.
